EMPLOYMENT SUMMARY

BOOM Image Studio - Frontend Engineer

Milan, April 2020 - Ongoing

- My team builds the core product of the company: a platform in which professional photographers can connect to companies who need photos for their product.
- I significantly contributed building part of the website frontend.
- I worked 1 month building the website frontend for "SalesBook", a project launched by BOOM and used to complete the photo business flow.

Finleap - Frontend Developer

Milan, October 2019 - April 2020

- My team builds SaaS software for "Cessione del quinto", an Italian Administration process to obtain a loan.
- I contributed by building parts of the website frontend.
- I work in React and I learnt a lot both on the tech side (software development best practices and team work) and on the personal side as I got to enjoy a young workspace and disrupting company environment.

Saint Mary Boulevard - Manager

Verona, March 2016 - March 2020

- I started this project when I was 20 together with my brother.
- Our concept was to create a clothing brand after the name of the town where we lived. It started as a fun side-project, but it became a solid reality and one of the most popular brand in Verona and near towns. We also partnered with schools and small-to-medium sized associations to create customised clothing.
- During these years I learnt how to manage a business and all the components that revolve around it: relationship with customers and suppliers, taxes, marketing tactics and managing my own business.
